FIND THE RIGHT CUSTOMERS.

Ideal Customer Profile & Prospect Qualification Framework

A practical, evidence-led framework for identifying small B2B SaaS companies that may benefit from creative marketing support.

NORTHFRAME STUDIO

B2B Lead Generation Portfolio

Prepared by: Suresh Yadav

FICTIONAL CONCEPT PROJECT

ICP DESIGN

IDEAL CUSTOMER PROFILE

Proposed target profile for a small creative-services provider serving B2B SaaS teams.

CORE FIRMOGRAPHICS

INDUSTRY

B2B SaaS and business software

STAGE

Early-stage and growing small businesses

SIZE

5–50 employees (illustrative range)

MARKETS

English-speaking markets, subject to delivery capability

DECISION-MAKER ROLES

- Founder
- Co-Founder
- CEO
- Head of Marketing
- Marketing Manager

POTENTIAL NEEDS TO INVESTIGATE

- Website messaging is hard to follow
- Inconsistent social publishing
- Limited content/design capacity
- Marketing graphics need improvement

RESEARCH GUARDRAIL

These are qualification hypotheses, not verified facts about real companies.

Use observable public evidence to validate fit. Public visibility alone does not establish buying intent.

BUYER PERSONA

A BUYER PERSONA TO GUIDE RESEARCH

A fictional profile used to organize questions - not a real individual or verified buyer study.

FICTIONAL PERSONA

AM

Alex Morgan

Founder | Small B2B software company

Research lens

A founder balancing product, credibility and limited marketing capacity.

BUSINESS PRIORITIES

Explain the product clearly • Build credibility with prospects
Maintain a consistent online presence • Use marketing resources efficiently

POTENTIAL CHALLENGES

Limited internal marketing capacity • Unclear website messaging
Inconsistent content production • Few dedicated design resources

WHY NORTHFRAME STUDIO COULD FIT

Website copywriting to clarify the offer • Social content to support consistency
Marketing design support for graphics and campaign assets

Disclosure: Alex Morgan is fictional. The profile is a planning aid, not evidence of a real buyer or market validation.

QUALIFICATION

POSITIVE VS. NEGATIVE SIGNALS

Separate observable evidence from assumptions before allocating research time.

POSITIVE SIGNALS TO INVESTIGATE

- Company has a functioning public website.
- Company sells a B2B software product.
- A relevant decision-maker role can be identified.
- Public marketing materials suggest a possible content or messaging need.
- Company appears to fit the target size and industry.

NEGATIVE / DISQUALIFYING SIGNALS

- Company is outside the target industry.
- Business is inactive or cannot be reasonably verified.
- No plausible service fit can be identified.
- Contact information is restricted or cannot be collected appropriately.
- Company has explicitly opted out of marketing communication.

A public website or visible role is not proof of buying intent, consent, or readiness to purchase.

LEAD SCORING

TRANSPARENT LEAD SCORING FRAMEWORK

Five criteria. Two points each. Score evidence, not intuition. Maximum: 10 points.

CRITERION	RANGE	HOW TO INTERPRET THE SCORE
Industry relevance	**0–2**	0: outside target | 1: adjacent / unclear | 2: clear B2B SaaS fit
Company size fit	**0–2**	0: outside range | 1: uncertain / near range | 2: evidence suggests 5–50
Decision-maker role	**0–2**	0: none identified | 1: plausible | 2: relevant role publicly identified
Potential service need	**0–2**	0: no plausible fit | 1: weak signal | 2: observable, specific need
Public information quality	**0–2**	0: unreliable | 1: gaps remain | 2: credible company / role information

MAXIMUM SCORE

10

5 criteria × 2 points

Strong potential fit still requires verification.

HYPOTHETICAL EXAMPLE

EXAMPLE SOFTWARE CO.

2 + 2 + 2 + 1 + 2

9 / 10

STRONG POTENTIAL FIT

8–10 STRONG POTENTIAL FIT

5–7 POSSIBLE FIT

0–4 LOW FIT / DEPRIORITIZE

A 9/10 score is a hypothetical fit assessment - not proof of purchasing intent.

RESEARCH WORKFLOW

A REPEATABLE RESEARCH & QUALIFICATION WORKFLOW

Move from a defined market to a reviewable prospect list, with evidence and safeguards at each step.

01
Define target market
Industry, stage, size and market

02
Find relevant companies
Create an initial candidate list

03
Review public website
Product, messaging and credibility

04
Check industry and size
Validate core firmographics

05
Identify relevant role
Founder or marketing decision-maker

CONTINUE

06
Record source + date
URL, source type and access date

07
Assess potential service fit
Note specific, observable evidence

08
Verify permitted business contact
Use appropriate public business sources

09
Record qualification decision
Score, rationale and next action

10
Respect opt-outs and rules
Apply privacy and channel requirements

OUTPUT | Structured, reviewable prospect list with source evidence, scores, research status and next action.

FRAMEWORK SUMMARY

BETTER TARGETING.
MORE RELEVANT OUTREACH.

A repeatable structure for research-led prospect selection.

01 DEFINED ICP

Target industry, company size and market profile.

02 RELEVANT ROLES

Founder, CEO and marketing decision-makers.

03 QUALIFICATION SIGNALS

Positive indicators and disqualification rules.

04 TRANSPARENT SCORING

Consistent criteria with a 10-point maximum.

05 REPEATABLE WORKFLOW

Evidence, research dates and recorded decisions.

06 DATA & PRIVACY SAFEGUARDS

Appropriate business sources and opt-out respect.

RESEARCH FIRST. QUALIFY CAREFULLY. OUTREACH RELEVANTLY.
