B2B LEAD GENERATION PORTFOLIO

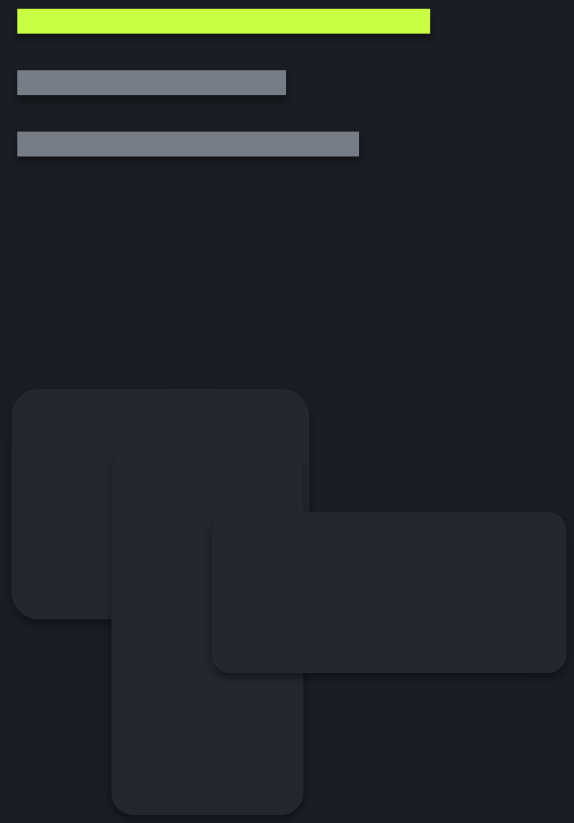

RELEVANT OUTREACH STARTS WITH RESEARCH.

B2B Cold Email & LinkedIn Outreach Framework

Prepared by: Suresh Yadav

FICTIONAL CONCEPT PROJECT

A practical system for thoughtful, relevant prospect conversations.

A relevance-first outreach system

A repeatable workflow built around verified context, role fit and respectful follow-through.

01 RESEARCH → 02 PERSONALISE → 03 OFFER RELEVANCE → 04 ASK A SIMPLE QUESTION → 05 RECORD OUTCOME

THE SEQUENCE

01	Research the company before contacting anyone.
02	Choose a role with a plausible connection to the offer.
03	Use one genuine, publicly available business observation.
04	Describe a relevant service in plain language.
05	Use a simple, low-pressure question as the CTA.
06	Follow up only when appropriate and permitted.
07	Respect opt-outs and stop after a clear decline.

QUALITY GATE

No observation, no personalisation claim.

Check source, date and relevance before drafting.

DO NOT

Mass-message irrelevant contacts, imply a website audit you did not perform, or continue after an opt-out.

Three touches. One respectful path.

Templates are starting points. Replace placeholders and verify the opening before sending.

Closing the loop

Hi [First Name],

I will close the loop here so I do not clutter your inbox.

If website copy, marketing design or social media content becomes a priority in the future, you are welcome to reach out.

Thanks for your time.

Best,

NEVER SEND AFTER AN OPT-OUT OR STOP REQUEST

Conversation before conversion

Keep each message native to the platform: brief, specific and easy to decline.

MESSAGE 01

CONNECTION REQUEST

Hi [First Name], I work on website copy, marketing design and social media content for businesses. I came across your professional profile while researching the B2B SaaS space and would be glad to connect.

GOAL: CONNECT, NOT PITCH

MESSAGE 02

AFTER ACCEPTANCE

Thanks for connecting, [First Name]. I help businesses communicate their value through clear website copy and consistent marketing content. Is improving either area something your team is considering?

GOAL: CHECK RELEVANCE

MESSAGE 03

RELEVANT FOLLOW-UP

Hi [First Name], one possible area to explore for a SaaS business is making its product messaging clearer across the website and social channels. If that is relevant to your current priorities, I can share a brief idea. No worries if it is not a focus.

GOAL: OFFER A USEFUL NEXT STEP

PERSONALISE EVERY MESSAGE. Follow LinkedIn terms and the recipient's preferences. Do not automate indiscriminate messaging.

Personalisation must be reviewable

Record the source and date so another person can validate the reasoning.

FIELD	WHAT TO RESEARCH	HOW TO USE IT
Company name	Verify the correct business.	Avoid confusing similarly named companies.
Website	Understand the product and services.	Ground the message in the actual offer.
Industry	Check fit with the target market.	Prioritise relevant B2B SaaS prospects.
Decision-maker role	Confirm responsibility and relevance.	Contact a role plausibly connected to the need.
Public business observation	Record a genuine, specific context.	Use one factual point; avoid assumed pain.
Potential service fit	Connect the observation to a service.	Offer one focused, practical idea.
Source and date	Save the URL and research date.	Make the research traceable and reviewable.

ILLUSTRATIVE ONLY

EXAMPLE SOFTWARE CO.

HYPOTHETICAL OBSERVATION

The public website has a product overview page with limited explanatory copy in this fictional scenario.

POTENTIAL IDEA

Suggest clearer, benefit-focused website messaging.

Not a real company audit. Verify all facts before outreach.

SOURCE + DATE = ACCOUNTABILITY

Track the work. Do not invent the outcome.

Editable tracker structure with demonstration-only rows. Performance values remain blank until actual data exists.

DEMO DATA - NOT VERIFIED

Personalised. Relevant. Respectful.

The system should make good judgement repeatable, not replace it.
